

Name: \_\_\_\_\_

Class: \_\_\_\_\_

**Module 6: Congestion Pricing and Flowcharting**  
**Lesson 1: Congestion Pricing**  
**Symbols in Flowcharting Worksheet**  
**Grade Level: 9 - 12**

Name	Symbol	Use/Indication
Terminator		Used to show the _____ of the process.
Process		Displays an _____ as part of the overall process; a calculation, updating a variable, defining a variable, etc.
Decision		Indicates a point in the process where _____ _____ This choice/decision is usually _____ or _____ _____. Text inside the symbol describes the choice, and then arrows flowing out of the sides are labeled based on the outcome. (Usually these arrows extend out from the right and bottom).
Data		Indicates any type of _____ to and from a process. Example: get X from the user, or print Y.
Connector		Connectors are used to _____ _____. Also known as a node or connecting node. Standard practice is that two or three arrows flow in, and only one flows out from the connector.
